

IN THE CLAIMS:

Claim 1 (previously amended): A method for creating websites for ~~individuals, healthcare facilities and one of~~ a plurality of healthcare providers, the method comprising the steps of:

providing a remote server having a database;

accessing the remote server via a first remote computer on a computer network;

accessing a form in the database via the first remote computer on the computer network wherein the form includes pre-defined information and pre-defined attributes wherein the pre-defined attributes are characteristics of the plurality of healthcare providers;

selecting the pre-defined information from the form wherein the pre-defined information describes one of the plurality of healthcare providers;

selecting one of the pre-defined attributes from the form wherein one of the pre-defined attributes corresponds to healthcare services provided by one of the plurality of healthcare providers;

creating a website having a first web page by the first remote computer on the remote server wherein the website identifies one of the plurality of healthcare providers providing the healthcare services ~~wherein the website is designed with the pre-defined information and one of the pre-defined attributes;~~

editing a presentation of the website wherein one of the

plurality of healthcare providers selects a preference from the remote server via the first remote computer wherein the presentation of the website is based on the preference and further wherein the preference relates to one of a style of the website, a text of the website or a graphic of the website;

designing the first web page of the website wherein the pre-defined information and one of the pre-defined attributes on the first web page of the website are arranged on the first web page by one of the plurality of healthcare providers via the first remote computer; and

linking the website to the database wherein the database is searchable via a search engine wherein the search engine searches the database for specific attributes wherein one of the specific attributes corresponds to one of the pre-defined attributes.

Claim 2 (previously amended): The method of Claim 1 further comprising the step of:

searching the database for the specific attributes.

Claim 3 (previously amended): The method of Claim 1 further comprising the step of:

creating an update button on the website for instantly amending the database when the update button is chosen by one of the plurality of healthcare provider.

Claim 4 (previously amended): The method of Claim 1 further comprising the step of:

storing the pre-defined attributes on the database for recall of the pre-defined attributes for placement on the website.

Claim 5 (previously amended): The method of Claim 1 further comprising the step of:

networking a plurality of databases for storing the website.

Claim 6 (previously amended): The method of Claim 1 further comprising the step of:

accessing the remote server for recalling the website stored on the database.

Claim 7 (previously amended): The method of Claim 1 further comprising the step of:

adding links to the website for linking other websites relating to other healthcare providers to the website.

Claim 8 (previously amended): The method of Claim 1 further comprising the step of:

adding one or more photographs, graphics and logos to the website via the remote computer.

Claim 9 (previously amended): The method of Claim 1 further comprising the step of:

associating the website with one or more practitioners who practice at least one of a practice, a clinic, a hospital or a healthcare facility.

Claim 10 (currently amended): The method of Claim 1 further comprising the step of:

creating one or more web pages on the website having information thereon related to a practice location of the ~~healthcare provider wherein~~ one of the plurality of healthcare ~~provider providers~~ has a practice location.

Claim 11 (previously amended): The method of Claim 1 further comprising the steps of:

accessing the database via a second remote computer;

searching the database for the pre-defined attributes of the website; and

displaying the website.

Claim 12 (previously amended): The method of Claim 1 further comprising the steps of:

choosing pre-defined information to add to the website wherein the pre-defined information uniquely identifies the website to search the website for the pre-defined information.

Claim 13 (currently amended): The method of Claim 1 further comprising the step of:

adding a plurality of web pages to the website related to one of the healthcare ~~provider~~ providers.

Claim 14 (previously amended): The method of Claim 1 further comprising the step of:

organizing the pre-defined attributes into files for storage within the database; and

searching the files via a search engine for at least one of

the pre-defined attributes stored within the database.

Claim 15 (previously amended): A system for creating websites for healthcare providers, the system comprising:

a remote server having a database therein wherein the database is accessible by a computer network;

a first remote computer connected to the remote server via the computer network wherein a website having a web page is created on the remote server via the remote computer using pre-defined information contained on the remote server wherein the pre-defined information corresponds to one ~~of a plurality~~ of healthcare providers wherein the pre-defined information describes amenities of one of the healthcare providers and identifies a location of one of the healthcare providers wherein the web page is created with the pre-defined information and further wherein the website is stored on the database;

a list of design choices in the database wherein one of the healthcare providers selects a design choice from the list of design choices wherein the design choice effects a presentation of the web page of the website and further wherein the design choice relates a style of the web page, a text, a graphic, a photograph or a link from the website; and

a list of pre-defined attributes in the database wherein one of the pre-defined attributes is selected from the list of pre-defined attributes wherein the pre-defined attributes identify

healthcare services of the healthcare providers wherein one of the healthcare providers arranges the pre-defined information and one of the pre-defined attributes is displayed on the web page of the website via the remote computer wherein one of the pre-defined attributes describes one of the plurality of healthcare providers.

Claim 16 (original): The system of Claim 15 further comprising:

an update button on the website for instantly amending the website via the remote computer.

Claim 17 (original): The system of Claim 15 further comprising:

an update button on the website for instantly amending the pre-defined attributes contained in the database.

Claim 18 (previously amended): The system of Claim 15 further comprising:

a search engine on the remote server for searching the database for the website via the pre-defined attributes.

Claim 19 (original): The system of Claim 15 further comprising:

a plurality of databases networked together for storing and accessing the website.

Claim 20 (original): The system of Claim 15 further comprising:

a second remote computer wherein the second remote computer accesses the website.

Claim 21 (original): The system of Claim 15 further comprising:

links on the website for linking other websites to the website.
